CENORED TARIFFS - APPENDIX

Rules and Conditions Applicable to the Tariffs valid from July 2009

The following rules and conditions are part of the approved tariffs of CENORED:

- Customers in settlement areas of the Oshikoto, Kunene and Otjozondjupa Regions will be charged the same tariffs (referred to as RC Areas).
- CENORED may at its discretion offer temporary reduced rates to individuals or customer groups in case of unreasonable increases due to tariff harmonisation.
- A minimum monthly demand charged at 70% of notified maximum demand is applicable to all LPU [kVA] and LPU [kW] customers. Customers are responsible for notifying their required maximum demand to CENORED. Only capacity notified and paid for will be reserved by CENORED for the Customer.
- Tariff breaker Amperage charges are billed on the nominal circuit breaker Ampère per phase (e.g. a three phase 60 Ampère breaker is treated as 60 Ampère, not 3 x 60 Ampère). Where different circuit breaker ratings are installed on different phases of a BUS 3 supply the sum of ratings divided by 3 rounded UP to the nearest number divisible by 10 will be used for billing purposes. These instances need to be fitted with 3 phase breakers as soon as practicable.
- Ex-NamPower customers will be billed the extension charges / monthly rental (calculated on a per customer basis as contained in existing contracts) in addition to the respective rates and charges.
- LPU tariffs are applicable to connections exceeding 3x100 Ampère at LV or 70kVA at MV.
- BUS3 tariff is applicable up to and including 3x100 Ampère at LV. CENORED will publish breaker rating steps available.
- DOM tariffs are applicable up to and including 1x60 Ampère at LV. CENORED will publish breaker rating steps available.
- BUS1 tariffs are applicable up to and including 1x80 Ampère at LV. CENORED will publish breaker rating steps available for categories of customers.
- LPU kW tariff is not available to new customers.
- Rural MV supplies are defined as individual connections that are provided by means of a dedicated transformer point from a rural medium voltage network (typically farms).
- Plots MV supplies are defined as individual connections that are provided by means of a dedicated transformer point from a plot area medium voltage network (typically smallholdings close to towns, e.g. around Otavi, Mannheim at Tsumeb and around Grootfontein).
- An extra supply on a Rural MV or Plot MV network is defined as a second or further supply taken on the same registered property by the same legal person.
- Institutional Customers are any form of Government, Parastatals and Government Owned Enterprises.
- For new rural MV supplies the customer is responsible to pay the full capital cost for making the supply available, including the costs of design, engineering and project management. The network assets remain the property of CENORED. Where network parts have been funded by other consumers a contribution to these costs may be payable (which will be refunded to those who paid for the original network) on a base principle of fairness and subject to rules determined by CENORED.
- Power will be purchased from small independent renewable energy producers at N\$0.60 per kWh, subject to rules and limits as determined by CENORED (rate based on average NamPower purchase cost). Meters capable of measuring incoming and outgoing kWh units separately will be installed at such connections. Normal CENORED rates will be payable for the incoming connection while the outgoing rate will be paid by CENORED for all units fed back into CENORED's network. Capacity received may not be exceeded by outgoing capacity unless agreed by CENORED. Such connections are also subject to CENORED approval of technical specifications regarding synchronization and protection.
- Customers may reduce their notified demand by giving 12 calendar months advance notice in writing to CENORED.

- The notified demand will not be reduced below the highest demand registered during the 12 months preceding the month where the application for change is received, unless a concrete and credible motivation is provided by the customer.
- Notified demand will automatically be adjusted upwards (subject to available installed capacity) if the metered demand exceeds the originally notified demand.
- Applications for increased notified demand will be processed and implemented as soon as possible, and not be subject to notice periods. However they may be subject to waiting periods to allow for installation of upgraded infrastructure where needed or not possible at all.
- Applications to reduce notified demand will only be entertained after a minimum of twelve months after inception of a power supply contract or twelve months after notified demand was increased through an application by the customer.
- CENORED shall not be obliged to reserve capacity in excess of current notified demand of a customer. This means that a customer who reduces his notified demand forfeits all future rights to the capacity surrendered. It also means that CENORED can sell excess installed capacity to another customer without notifying other customers. If a customer requests CENORED to install more capacity than his notified demand requires, CENORED may do so but will not be bound to reserve this capacity for the customer who requested the installation.
- LPU customers who wish to either cancel their supply contract completely or downsize to a BUS tariff must give at least twelve (12) months notice thereof to CENORED in writing.
- All new domestic connections will be fitted with a prepayment meter.
- Medium voltage network connections on rural and plot medium voltage networks are not regarded as domestic customers.
- All disconnected domestic installations (voluntary disconnection or due to default) will be converted to prepayment meter at the expense of the customer before re-connection.
- All temporary connections in local authority and settlement areas (such as builder's connections) shall be supplied with a prepayment meter on business tariffs, except where the capacity exceeds 70kVA .
- VAT at applicable rate will be added to all published rates.
